## OUR MISSION

AANT - Accademia delle Arti e Nuove Tecnologie is located in Rome and it is an Academy for advanced training and research in the fields of visual arts, design and applied arts, communication and art didactics. It fosters the study, transmission, and progress of contemporary creative expression and it cherishes the artistic and historical heritage creating and developing a system of cultural and artistic exchanges among public and private subjects on a national and international level.

We at AANT put students and their needs first and offer a comprehensive course oriented to full students occupation.

Our course integrates:

- Study and practice;
- Love for beauty in all its forms.
- Learning the most innovative technologies.
- Talent development;
- Competent professors;
- A welcoming learning environment capable of enhancing human relations.

We pay the utmost attention to quality in training and professors selection, and we organize extracurricular experiences outside and inside the Academy. The new course structure allows for students to receive a Bachelor's Degree after a three-year course.

The most important goal for our academy is always the same: to train new professionals ready to enter immediately the world of work.

*Dreamers when they arrive, professionals when they go, this is our motto.*
